\$274K
HIGHEST SINGLE POSTING

Demand vs. Pay by Sector

Top 6 Highest-Paying Titles

TITLE	SECTOR	SALARY
Professionalism Officer	Cust. Support	\$274,254
City Medical Examiner II	Healthcare	\$258,988
Officer	Cust. Support	\$245,000
Dir., Distribution Ops (PM)	Project Ops	\$235,556
Dir., Distribution Ops (Eng)	Project Ops	\$235,556
Bureau Chief, Crime Victims	Cust. Support	\$220,671

▲ **Outlier caution:** mostly single-posting, senior/executive civil-service titles — ceiling examples, not typical pay for the title.

Data-Related Roles — Top Paying

TITLE	POSTINGS	SALARY
Data Analyst — Litigation	2	\$102,118
Cybersecurity Data Analyst	2	\$100,783
Data Analyst	1	\$100,000
Data Analyst — VPI Bureau	4	\$94,324
Operations Data Analyst	2	\$94,324
Management Audit Data Analyst	2	\$80,000

Where Data Roles Get Hired

SECTOR	POSTINGS	AVG. SALARY
Customer Support & Admin	14	\$101,891
Project & Ops Mgmt	8	\$88,834
Software & Technology	6	\$99,454
Healthcare & Medicine	6	\$74,536
Human Resources	4	\$94,324

38 data postings total (1.88% of dataset) — Senior level n=1 (\$100K), Mid-Level n=6 (\$128K avg); too small to generalize.

National context — NY isn't the volume leader, but the pattern holds: Nationally, California (Silicon Valley), Washington (Seattle), and Texas (Austin/Dallas) lead on *tech hiring volume*; New York's strength is FinTech/ad-tech density rather than raw tech headcount. That national pattern shows up inside this dataset too — Software & Technology is NYC government's **smallest** sector by volume (50 of 2,148 postings) yet its **highest-paying** (\$100,455). Low volume for data/tech roles doesn't signal low value — it signals a scarce, well-compensated skill set, consistent with every major U.S. tech hub pairing strong demand with above-average pay.

Key Findings

Highest demand ≠ highest pay
Customer Support & Admin has the most postings (855) but ranks near the bottom on salary — Software & Tech pays most (\$100,455) with only 50 postings.

Seniority beats sector
Senior roles average \$139,145 vs. \$80,814 at Entry-Level — a 72% gap, the strongest single salary predictor found.

Top salaries are outlier-driven
The \$274K-\$210K top titles (table above) come from single/rare postings — sector averages (Sec. above) are the reliable benchmark, not these ceilings.
